### EXPERIENCE

2004 - Present Southeastern, MI	<b>Freelance photography</b> is something I've developed extensive technical skills for. I've been a retoucher, done color correction and worked in image enhancement with Adobe Photoshop for over 8 years. Assisting other photographers in the industry taught me how to manage a broad workflow of images, use compact flash and SD cards and gave me experience with proofs and album design. Recently, I finished assisting on a shoot for a new campaign with Gleaners Food Bank to fight hunger in southeastern Michigan.
2005 - Present Rochester, MI	<b>Trent Design</b> hired me to produce materials that dealt with everything from non-profits to large corporations. My work included design for identities, environmental signage, annual reports, direct mail, websites and print collateral. I also art directed for product photo shoots, video for motion-based graphics and re-brandings.
2006 - 2007 Royal Oak, MI	<b>Trademark Productions</b> is a web and SEO marketing firm. They brought me on to develop wireframes, layouts and logo identities. My time spent there taught me how create visual strategies for direct e-mail and marketing campaigns. I also produced user-interfaces for administrative software and directed photography.
